

STATEMENT OF PURPOSE

INTRODUCTION

I Anil, was born and brought up in a northern state of Uttar Pradesh in India. I take a great pride of writing this statement of purpose to express my interest in pursuing Masters in Data Science from Universities and colleges in the UK.

I believe that life always present with an opportunity but, it always depends upon the individual how he make the full use of it. The program will give me full opportunity to enhance my knowledge and skill and will also help me elevate my professional carrier.

I have passed my Bachelors in Science in 1995 from CCS University, Meerut and now pursuing Masters of Computer Application from Sir Chhotu Ram Institute of Engineering and Technology, Meerut.

In-between 1995 to 2020, I worked in different field such as Farming, Fisheries and many more business. Now a day these new advanced computer technologies play an important role in our life. These things inspire me to know how it working and how it is efficient for carrier purpose, that's why I prefer to attempt Masters of Computer Application.

Since now I am more curios in this field. So, I want to invest my next few more years to know and improve my skills in this field for my professional carrier.

WHY DATA SCIENCE(MSc)

As the world is becoming increasingly digital, we are openly embracing the universality of data in every device or technology we use. I have always been fascinated by this omnipresence of data reaching into our lives and how it has potential to find practical solutions to the serious problems that threaten the health, safety, and well-being of diverse populations increases by the day, and I found myself mesmerized by the world of data.

As a Masters student, I spent hours on my laptop taking part in many data science competitions around the world. I opted for a Masters in Computer Science at Sir Chhotu Ram Institute of Engineering and Technology. From here it is a clear dive into the world of maths and computers learning about Data Science. I learnt so many things during the course of these one and half years and most important among these was the understanding of how diverse the field of data science is. I learnt how data science is making a mark for itself in every possible field there is including business, communication and health. So the more I studied, the more I wanted to explore and learn. And this enthusiasm is what brought me to apply for an MS in Data Science. What drove me towards pursuing an MS in Data Science is my curiosity to know more about the fields that I just touched upon during my undergraduate years. I have built a strong foundation for myself through MCA but now I wish to take it further and claim complete proficiency in the field. So, before entering the

professional world I wish to learn all that I could on the academic front. And I believe that for this, acquiring an MS in Data Science would be a step in the right direction. This is exactly what prodded me to pursue a Masters in Data Science and I believe that this will be the stepping stone towards the heights that I wish to reach in the field of Data Science.

WHY _____ UNIVERSITY COLLEGE

My direction to choose University is based on various factors; one that University is one of the most reputed institutions on the world and secondly the course content is also evidently different than the others option I explored. The institute not only has an excellent record of teaching quality but it also caters to a diverse group of students which adds to the exposure and experiences. Therefore, this Masters from this University is the best option for me to fill out the pieces of puzzle in my carrier growth. Also, I expect this master's degree to be of utmost influence in my career, providing me an edge in the flourishing Indian as well as recovering global markets post the pandemic.

WHY UK

UK is a diverse country and the home to many-renowned colleges and universities. The country is known for its high quality of education, brilliant standard of living, friendly natives and breath-taking beauty. The quality of the universities in the UK means that your degree will be held in high regards by employers the world over, giving you an edge over other applicants. As a graduate or masters from a UK university, you're amongst incredibly talented alum - the British Council estimates that 38% of Nobel Laureates who studied abroad did it in the UK. This country has an exceptionally well-development education system and use of modern teaching aids is pretty common, which facilities learning and last but not the least, the PSW which gives an opportunity to experience the real work world and expose to the highest standards of work ethics.

FUTURE GOALS

I would perform to the best of my abilities and hope to acquire skills that will help me sustain and help me lead a stable and a successful life. I am confident that the skills I will acquired it will be helpful and capable of dealing with broad range of people and companies. I am having this belief that after the Masters I can get great opportunities across the world which will help me lead a better life.

I am aware that I will face various challenges in this program, and this Master's call for a high degree of commitment and diligence. I am confident that with my unwavering dedication and persistence, I shall be able to face al posted challenges. Hence, I request you to consider me for candidacy for the University.

Hope, my statement of purpose will help you to understand my intention to study in the UK. Thus, kindly request you to give me a chance to study there because it will be pioneer for me towards achieving my goal.

Regards,

Anil Kumar
